

CONFÉRENCE

Dr. Rumi KONDO

Ochanomizu University

« **What makes insects the most successful animals?**

A close look at adaptation potential in flies »

INSCRIPTION OBLIGATOIRE: mujapon@unistra.fr

Insects are very successful in colonizing high diversity of niche environments. However, the genetic bases of host specialization are not known. I will introduce an example of a fruit fly species, *Drosophila sechellia* and how the behaviors and the genes are adapted to its host.
