

**Conférence**

*« Magic of Magnetic Fields and Harmony of Scales:  
From Electromagnetic Functional Fluids  
to Japanese Scales »*

Organisée par

Maison

universitaire France-Japon

Université de Strasbourg

Conférence de

**Prof. Hidemasa TAKANA**

Tohoku University

I will first dive into the world of magnetic fluids, exploring their dynamic responses to external magnetic fields and their pioneering applications in advanced engineering. After exploring magnetic phenomena, I will then discuss the enchanting realm of Japanese musical scales. Here, I will reveal how these scales not only form the foundation of traditional Japanese melodies but also resonate with Japan's cultural heritage.
